

Wolfpack Research

Cary, NC | wolfresearch@ncsu.edu | (999) 123-4567

EDUCATION

North Carolina State University, Raleigh, NC

December 20XX

B.S. in Statistics & B.S. in Mathematics

GPA: 4.0/4.0

Relevant Coursework: Bayesian Analysis, Real Analysis, Statistical Learning, Mathematical Foundations of Data Science, Regression Analysis, Experimental Design, Survey Sampling, Data Management, Numerical Analysis, Abstract Algebra, Linear Algebra, Differential Equation, Software Development Fundamentals, Public Speaking, Technical Communication

TECHNICAL SKILLS

Programming: R Markdown, R Shiny, SAS, Python, Jupyter Notebook, MATLAB, LaTeX, SQL, Java

Data Visualization: Tableau

Version Control: [GitHub](#)

Productivity & Teamwork: Notion, Google Colaboratory, Gantt Chart

RESEARCH EXPERIENCES

NC State University Directed Research for Undergraduates in Mathematics and Statistics May 20XX – Aug 20XX

Research Intern (Funded by NSF and NSA through the Research Experience for Undergraduates program)

- Applied Transfer Learning based on Causal Inference and Potential Outcome Framework
- Developed optimal, interpretable, targeted individual treatment rules in linear and tree forms
- Observed rigorous professional research routine
- Evaluated simulation study results on newly developed methods
- Applied statistical methods to large-scale data from eICU-CRD and MIMIC-III clinical database
- Delivered biweekly oral presentations on research updates to professors and fellow research interns
- Prepared and presented research poster at NCState Summer Research Symposium and JMM 2025
- Communicated professionally with research advisors and colleagues to complete research and author research paper

GRE Scores and STEM Graduate Student Success Research

March 20XX – Apr 20XX

Student Researcher

- Conducted research on the relationship between GRE scores and STEM graduate student success
- Applied extensive EDA and Logistic Regression to large-scale education data
- Interpreted findings to stakeholders to inform the application review process
- Presented research poster at NCState Spring Research Symposium

Dexcom Continuous Glucose Monitor Devices Investigation

Oct 20XX – Dec 20XX

Data Scientist

- Performed data wrangling on the device report data in the MAUDE database from FDA
- Produced STL Decomposition graph and observed seasonality and trends in the frequency of historical device reports and analyzed cause
- Fitted seasonal ARIMA model to data in time series analysis and forecasted future frequency of device reports
- Applied Latent Semantic Analysis in topic modeling and extracted key topics in the device reports to provide proper recommendations that address device failure problems
- Organized weekly team meetings for five-member team to assess project process and set weekly goals
- Reported findings to course professor and classmates

Kpodclustr R package vignette

Nov 20XX – July 20XX

Author

- Authored introductory and tutorial documentation webpage for R package “kpodclustr”, which applies k-means clustering with k-means++ to incomplete data
- Explained technical journal and source code in detail using user-friendly documentation
- Analyzed and visualized data clustering results to illustrate the performance of the R package
- Coordinated workflow with a university professor

Tropical Storms Data Visualization – SAMSI Undergraduate Workshop

May 20XX

Developer

- Created interactive R Shiny application that visualizes up to four decades of IBTrACS tropical storm data with user customization
- Performed time series analysis on tropical storm data that aims to forecast the average wind speed of future storms
- Presented findings to professors, graduate students, and other workshop attendees

WORK EXPERIENCE

Department of Statistics, NC State University, Raleigh, NC

Sept 20XX – Present

Teaching Assistant

- Held online office hours for the special topic course Statistical Learning and Data Analysis
- Promoted critical thinking and problem-solving skills during student interactions by posing questions to challenge the student’s perspective and offering different potential outcomes for course projects and homework assignments
- Conveyed students’ questions to professor weekly

PackRanks (packranks.com), NC State University, Raleigh, NC

June 20XX – Dec 20XX

Cofounder, Data Scientist, Project Manager

- Generated the proprietary PackRanks rating formula from 10 years of University Registration and Records grade distribution data
- Analyzed over 2000 users’ activity data to enhance the performance of the web application
- Directed and supervised tasks to completion to promote work efficiency
- Developed leadership skills through decision-making that represents the group’s best interest

The Daniel Center for Math and Science

Aug 20XX – Dec 20XX

Student Tutor

- Taught children from age 9 -12 in math and science courses identifying their strengths and their areas of growth to establish sustainable study habits
- Fostered interests for STEM fields of study in children from underrepresented groups

MEMBERSHIPS / AFFILIATIONS

Phi Beta Kappa National Academic Honor Society

May 20XX

Mu Sigma Rho National Statistics Honor Society
